SIMGOLFNOW™

11/12/2025

To Whom It May Concern:

We are pleased to recommend **SimGolfNow** based on our experience operating the SimGolfNow location at **818 Tom Hall Street in Fort Mill, South Carolina**.

Working with SimGolfNow has given us the opportunity to bring a professionally designed, technology-driven indoor golf experience to the Fort Mill market without having to build the entire operating model from scratch. From the booking platform and customer experience to access, payments, marketing, support, and day-to-day operating processes, SimGolfNow provides a framework that makes the business significantly easier to operate.

One of the things we have appreciated most is the combination of a proven operating model with the flexibility to run the location effectively in our local market. The SimGolfNow team understands both the golfer experience and the operational side of the business, and they have been responsive and collaborative as we have launched and grown the Fort Mill location.

The model also benefits from being highly automated and self-service. Customers can book, pay, access the studio, and enjoy a premium golf experience with minimal staffing requirements. That creates an attractive operating model while still delivering a high-quality experience for golfers.

We have also seen the benefit of being part of the broader SimGolfNow brand and platform. Rather than operating as an isolated golf simulator business, we are connected to a larger system focused on marketing, technology, customer acquisition, operational improvement, and continued growth.

For anyone considering adding an indoor golf simulator business or amenity to their property, we would highly recommend speaking with SimGolfNow. They offer a practical, well-developed approach to launching and operating a premium indoor golf experience and have been a valuable partner to us in Fort Mill.

We would be happy to speak with prospective partners about our experience operating the SimGolfNow Fort Mill location.

Sincerely,

Rob Warren & Kevin Zobel
